

## 5. Certification

---

I hereby certify that I have reviewed the groundwater monitoring system performance standards for C-Pond, located at the Greenidge Power Generating Station owned and operated by Greenidge Generation LLC, and the requirements in federal regulation 40CFR Part 257 Subpart D - Standards for the Disposal of Coal Combustion Residuals (CCR) in Landfills and Surface Impoundments published April 17, 2015 and last amended on September 28, 2020. The proposed groundwater monitoring system (with recommendations) has been designed and constructed to meet the requirements specified for CCR units in 40 CFR Part 257.91- Groundwater Monitoring Systems. Any future modifications to the groundwater monitoring system will be certified and added to the facility's operating record.

I am a duly licensed professional engineer in the State of New York.
